

SUPAWITH JANGTRAKUL

Junior Full-Stack Developer

Bangkok, Thailand (open to relocation) | s.jangtrakul@gmail.com | 091-016-1818
Portfolio: supawith-portfolio.vercel.app | GitHub: github.com/Pannnomaly1337

Junior Full-Stack Developer currently building **HotelHub**, a production-grade hotel property management system (Next.js · NestJS · PostgreSQL). Hands-on across the stack — React, Next.js, Node.js, NestJS, and PostgreSQL — through the Generation Thailand bootcamp. A career-changer from a Biology background, I bring analytical thinking, fast learning of new technologies, and clear technical communication, and I'm eager to grow in a modern full-stack team.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML5, CSS3
Frontend	React, Next.js, Tailwind CSS, shadcn/ui, React Hook Form, Zod
Backend	Node.js, Express, NestJS, REST APIs, Socket.IO, Google Gemini API
Database	PostgreSQL, Prisma ORM, MongoDB, Mongoose
Auth & Security	JWT, bcrypt
Tools & Workflow	Git / GitHub, Docker, Postman, Agile, Vercel, Render

PROJECTS

HotelHub — Hotel Property Management System In progress Repo: github.com/Pannnomaly1337/hotelhub
[Next.js](#) · [NestJS](#) · [TypeScript](#) · [PostgreSQL](#) · [Prisma](#) · [Socket.IO](#)

- Building a production-grade PMS for small-to-mid-sized hotels — a real-time management dashboard, over-booking prevention, and dynamic pricing to increase revenue.
- Sole developer: designed the full system architecture and modeled the core domain (rooms, room types, bookings, payments, housekeeping, reviews, users) as a PostgreSQL relational schema with role-based access control (RBAC).
- Built both the REST and WebSocket (Socket.IO) APIs, keeping room availability synchronized in real time across concurrent sessions to prevent double-bookings at the data layer.

Gamification Rewards System Live: gamification-rewards-system.vercel.app
[Next.js](#) · [TypeScript](#) · [NestJS](#) · [Prisma](#) · [PostgreSQL](#)

- Designed and shipped end-to-end as my first solo full-stack application — a rewards system with a complete play → earn → redeem → history flow.
- Owned the PostgreSQL schema and migrations, a typed NestJS REST API, and multi-service deployment (Vercel frontend + Render backend).

Hotel Booking Website Team project Live: group-project-6-react.vercel.app
[React](#) · [Tailwind CSS](#) · [shadcn/ui](#) · [Express](#) · [MongoDB](#) · [JWT](#)

- Bootcamp team project: contributed across the stack to deliver separate customer and admin interfaces with full CRUD operations.
- Implemented JWT/bcrypt authentication and hardened the API (Helmet, rate limiting), with Zod and React Hook Form validation.

WORK EXPERIENCE

Raw Milk Quality Control & Statistics Intern — Pakchong Dairy Cooperative, Nakhon Ratchasima Nov 2022 – Mar 2023

- Performed structured data collection and analysis on raw-milk quality, applying systematic problem-solving and rigorous documentation practices.
- Ran a three-year data-evaluation project to surface performance trends — building analytical and data-interpretation skills that transfer directly to debugging and technical workflows.

EDUCATION

Junior Software Developer Bootcamp (Cohort 11) — Generation Thailand Oct 2025 – Jan 2026
Full-time immersive program in front-end and back-end development: JavaScript, React, Node.js, Express, PostgreSQL, MongoDB.

Bachelor of Science in Biology — Suranaree University of Technology Jul 2019 – Mar 2022
First-Class Honors. Relevant coursework: Genetics, Microbiology, Biostatistics, Research Methodology.

ADDITIONAL INFORMATION

- Languages: Thai (Native), English (Intermediate)
- Core strengths: systematic work approach, clear technical communication, cross-team collaboration, task prioritization, adaptability.
