

SUPAWITH JANGTRAKUL

Junior Full-Stack Developer

Bangkok, Thailand (open to relocation) | s.jangtrakul@gmail.com | 091-016-1818

Portfolio: supawith-portfolio.vercel.app | GitHub: github.com/Pannnomaly1337

Junior Full-Stack Developer with hands-on experience building full-stack web applications using React, Next.js, Node.js, NestJS, and PostgreSQL. Recently completed the Generation Thailand software developer bootcamp, with strong foundations in problem-solving, clear technical communication, and cross-team collaboration. A career-changer from a Biology background, I bring analytical thinking and the ability to learn new technologies quickly. Highly motivated and adaptable, and eager to grow in a modern full-stack development environment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, React Hook Form, Zod

Backend: Node.js, Express, NestJS, REST APIs, Socket.IO, Google Gemini API

Database: PostgreSQL, Prisma ORM, MongoDB, Mongoose

Auth & Security: JWT, bcrypt

Tools & Workflow: Git / GitHub, Agile, Vercel, Render

PROJECTS

HotelHub — Hotel Property Management System *In progress*

Next.js · NestJS · TypeScript · PostgreSQL · Prisma

- Building a production-grade property management system for small-to-mid-sized hotels, featuring a real-time management dashboard, over-booking prevention, and dynamic pricing to increase revenue.
- Sole developer: designed the full system architecture, relational database schema, role-based access control (RBAC), and the REST and WebSocket API.

Hotel Booking Website *Live: group-project-6-react.vercel.app*

React · Tailwind CSS · shadcn/ui · Express · MongoDB · JWT (team project)

- Worked hands-on across the full stack — building both the frontend (React, Tailwind, shadcn/ui) and backend (Express, MongoDB) — to deliver separate customer and admin interfaces with full CRUD operations.
- Owned review of the site's end-to-end UX/UI flow; implemented JWT and bcrypt authentication and hardened the API with Helmet and rate limiting, using Zod and React Hook Form for form validation.

Gamification Rewards System

Next.js · TypeScript · NestJS · Prisma · PostgreSQL

- Developed a full-stack app implementing a complete game loop (play, earn score, claim rewards, view history, reset) backed by a REST API and a relational schema.
- Managed database migrations, API design, and multi-service deployment across Vercel and Render.

WORK EXPERIENCE

Pakchong Dairy Cooperative — Nakhon Ratchasima *Nov 2022 – Mar 2023*

- Performed structured data collection and analysis on raw-milk quality, applying systematic problem-solving and clear documentation practices that translate directly into debugging and technical workflows.
- Conducted a three-year data evaluation project to identify performance trends, strengthening analytical thinking, data interpretation, and collaboration skills relevant to software development.

EDUCATION

Bachelor of Science in Biology — Suranaree University of Technology *Jul 2019 – Mar 2022*

- Relevant coursework in Genetics, Microbiology, Biostatistics, and Research Methodology.

Generation Thailand — Software Developer Bootcamp (Cohort 11) *Oct 2025 – Jan 2026*

- Completed a full-time immersive program covering front-end and back-end development, including JavaScript, React, Node.js, Express, PostgreSQL, and MongoDB.

ADDITIONAL INFORMATION

- Languages:** Thai (Native), English (Intermediate)
- Technical writing:** documenting the HotelHub build as an ongoing article series.
- Core strengths:** systematic work approach, clear technical communication, cross-team collaboration, task prioritization, adaptability.
